GRADE
100%

Owned Rows

TOTAL POINTS 13

1. Why do we insist on producing a delete confirmation screen?

1 / 1 point

- ☒ Because a GET request should never modify data
- ☐ Because a POST request cannot modify data
- ☐ Because Django would not be able to delete the data
- ☐ To make sure that there are no JavaScript errors

Correct

2. Which of the following methods is called first in the Django generic list view?

1 / 1 point

- ☐ get()
- ☐ render_to_response()
- ☐ get_queryset()
- ☒ setup()
- ☐ startup

Correct

3. Which method do we override in the Django generic list view to keep users from making changes to rows they don't own?

1 / 1 point

- ☐ setup()
- ☐ startup
- ☐ render_to_response()
- ☒ get_queryset()
- ☐ get()

✓ Correct

4. What does OwnerUpdateView do if a user tries to delete a record that does not belong to them?

1 / 1 point

- ☒ It returns a 404 (not found error)
- ☐ It puts out an error message in the JavaScript console
- ☐ It redirects the user to www.djangoproject.org
- ☐ It stops and fails with an error log message

✓ Correct

5. What template variable indicates the current logged-in user?

1 / 1 point

- ☐ article.owner
- ☐ myarts.owner
- ☒ user
- ☐ tsugi.user
- ☐ request.user

✓ Correct

6. What is the name of the model that Django uses to store User objects?

1 / 1 point

- ☐ DjangoUsers
- ☐ settings.USERS
- ☐ Users
- ☒ settings.AUTH_USER_MODEL
- ☐ django.users

✓ Correct

7. What is the database relationship between the Article model and User model?

1 / 1 point

- ☐ Zero-to-Zero
- ☒ One-to-Many
- ☐ Many-to-Many

☐ One-to-One

✓ Correct

8. In views.py in the myarts sample code, what is the purpose of the "fields" class-wide value?

1 / 1 point

- ☐ To make the listed fields un-editable
- ☐ To double-check that model fields are not missing
- ☐ To list the fields that will be autosaved
- ☒ To limit the model fields displayed in the form

✓ Correct

9. For a data model named Frog, what is the generic Edit View convention for the template used when editing a Frog object?

1 / 1 point

- ☐ frog_edit.html
- ☒ frog_form.html
- ☐ frog_modify.html
- ☐ frog_update.html

✓ Correct

10. In the OwnerCreateView class, what method is overridden to set the "owner" field to the current logged-in user?

1 / 1 point

- ☒ form_valid()
- ☐ LoginRequiredMixin
- ☐ save(commit=False)
- ☐ add_owner()

✓ Correct

11. In OwnerUpdateView, how do we make sure that the current logged-in user cannot retrieve any rows that don't belong to them?

1 / 1 point

- ☐ We retrieve all the objects and throw away the non-owned objects
- ☐ We call the method of the same name in the super class

☐ We use the get_queryset method

- ☒ We add a model filter
- ☐ We intercept the SQL and add a WHERE clause

✓ Correct

12. In OwnerUpdateView, which is the "super" or "parent" class?

1 / 1 point

- ☐ get_queryset()
- ☐ SuperUpdateView
- ☐ UpdateView::Super
- ☒ UpdateView
- ☐ OwnerUpdateView

✓ Correct

13. When a generic edit view is receiving POST data, which of the following steps is done first?

1 / 1 point

- ☐ pre_post()
- ☐ form_valid()
- ☐ first_post()
- ☐ get_query_set()
- ☒ clean()

✓ Correct
