Django Forms

TOTAL POINTS 7

1. Which of the following is NOT a benefit of using the Django forms capability?

   1 / 1 point

   ⦿ Database portability

   ◯ You reduce the amount of HTML you need to generate

   ◯ You can add complex form validation rules to your application

   ◯ You can easily create attractively styled forms

   ◯ You can have a mapping layer between your models and templates

   ✓ **Correct**

2. What happens when a Create form is submitted and Django forms detects a validation error?

   1 / 1 point

   ◯ The form is re-displayed with the incorrect data

   ◯ The form is re-displayed with the error messages

   ◯ The record is deleted form the database

   ⦿ The form is re-displayed with the incorrect data and error messages

   ◯ A 403 (Not authorized) is sent back to the browser

   ✓ **Correct**

3. You cannot use a Django form unless it is connected to a Django Model.

   1 / 1 point

   ◯ True

   ⦿ False

   ✓ **Correct**

4. How do you indicate that you want to display a form using the Crispy library in a template?   **1 / 1 point**

   ○ form.as_crispy

   ○ csrf_token

   ○ form.as_table

   ● form|crispy

   ✓ **Correct**

5. What does the fields="__all__" statement do in the Meta section of a Django form class?   **1 / 1 point**

   ○ Indicates that the owner field is not supposed to be shown to the user when the form is displayed

   ○ Indicates that none of the model fields are to be saved

   ● Indicates that all of the underlying model fields should be in the form

   ✓ **Correct**

6. In what method in a view class would you expect to see "form.save()" to save data from an incoming form?   **1 / 1 point**

   ○ dispatch()

   ● post()

   ○ get()

   ○ get_queryset()

   ✓ **Correct**

7. What utility method simplifies the code needed to load the old model data when processing an update request?   **1 / 1 point**

   ○ render_to_template_with_check()

   ○ load_try_except()

   ○ contitional_render_404()

   ● get_object_or_404()

   ✓ **Correct**
